

Print and cut tutorial for Marfy patterns in PDF format.

- 1** - Print the file in size **Letter** or **A4**. Before start printing remember to select **100%** or **“Actual Size”** as scale of the page, otherwise pattern will be altered. You can check the right scale with the rulers that you find on pattern.
- 2** - Trim with scissors the right edge and the lower edge along the continuous line, so that the arrowheads are aligned with the edge, and join the pieces with adhesive tape matching arrows. For convenience in pulling the sheets, don't cut the left and upper edges, so that one side has a margin of support.
- 3** - Join all pages following the numerical order of the prospect in the first page, be sure that arrowheads match up in each side as well as the lines of the pattern.
- 4** - When the graph will be complete, cut or trace single pieces on onion paper following the line of the chosen size.
- 5** - Now the pattern is ready to be placed on fabric for the cut, remembering that seams and hems are not included.
- 6** - If you want to customize the pattern please look at our suggestions in the Marfy 2014/15.
